

1. There are two numbers. The second is two times the first. Their sum is 24. Find the numbers.
2. There are two numbers. The second is two more than the first. Their sum is 16. Find the numbers.
3. There are two numbers. The second is three times the first. Their sum is 28. Find the numbers.
4. There are two numbers. The second is three greater than the first. Their sum is 21. Find the numbers.
5. There are two numbers. The second is three more than two times the first. Their sum is 21. Find the numbers.
6. There are two numbers. The second is two less than twice the first. Their sum is 25. Find the numbers.
7. There are two numbers. The second is five more than six times the first. Their sum is 26. Find the numbers.
8. There are two numbers. The second is four greater than three times the first. Their sum is 28. Find the numbers.
9. There are three numbers. The second is two times the first. The third is three greater than the first. Their sum is 27. Find the three numbers.
10. There are three numbers. The second is two less than the first. The third is three greater than twice the first. Their sum is 17. Find the three numbers.
11. There are three numbers. The second is two more than five times the first. The third is three greater than three times the first. Their sum is 32. Find the three numbers.
12. There are three numbers. The second is two times the first. The third is three greater than the second. Their sum is 43. Find the three numbers.

13. The sum of two numbers is 20 and one is 4 greater than the other. Find the numbers.
14. If ten is added to 4 times a number, the result is 74. Find the number.
15. Six less than twice a certain number equals 18. Find the number.
16. Eight more than 4 times a number equals 48. Find the number.
17. One number is 12 greater than another. Their sum is 24. Find the numbers.
18. One number is 10 less than twice another number. The sum of the numbers is 50. Find the numbers.
19. Find two numbers such that one is 6 more than twice the other, and the smaller plus twice the greater equals 42.
20. One number exceeds another by 50. Twice the smaller number plus the larger number equals 95. Find the numbers.
21. One number is 16 less than 6 times another. The sum of the numbers is 40. Find the numbers.
22. Six times a certain number minus 2, equals five times the number plus 2. Find the number.
23. Five times a number is 10 more than three times the number. Find the number.
24. If 4 times a number increased by 4 equals the number increased by sixteen, find the number.
25. The sum of three numbers is 81. The second number is twice the first, and the third is 6 more than the second. Find the numbers.
26. There are three numbers such that the second is twice the first and the third is one less than three times the first. If the sum of the numbers is 35, find the largest number.

27. The sum of two numbers is 25 and one is 5 greater than the other. Find the numbers.
28. If eight is added to 5 times a number, the result is 33. Find the number.
29. Five less than twice a certain number equals 7. Find the number.
30. Six more than three times a number equals 27. Find the number.
31. One number is 11 greater than another. Their sum is 25. Find the numbers.
32. One number is 8 less than twice another number. The sum of the numbers is 19. Find the numbers.
33. Find two numbers such that one is 4 more than twice the other, and the smaller plus twice the greater equals 18.
34. One number exceeds another by 20. Twice the smaller number plus the larger number equals 53. Find the numbers.
35. One number is 16 less than 5 times another. The sum of the numbers is 32. Find the numbers.
36. Three times a certain number plus 2, equals two times the number increased by 4. Find the number.
37. Four times a certain number minus three, equals five times the number increased by 2. Find the number.
38. If 2 times a number increased by 10 equals thrice the number increased by six, find the number.
39. The sum of three numbers is 26. The second number is twice the first, and the third is 6 more than the second. Find the numbers.
40. There are three numbers such that the second is twice the first and the third is one less than three times the first. If the sum of the numbers is 29, find the numbers.
